

HARVARD UNIVERSITY

Undergraduate Summer Internship in Systems Biology

sysbio.med.harvard.edu/summer-internships

We will begin accepting applications this December for summer 2019 internships.

This 10-week paid internship includes a stipend and housing on the Harvard campus. Interns will work in Harvard labs, in a friendly environment that fosters close one-to-one mentoring. The program also includes seminars and lectures by distinguished faculty, poster sessions, and Harvard-wide summer research events.

Research opportunities in:

- Systems Biology
- Biophysics
- Bioinformatics
- Genetics and Genomics
- Cell Biology
- Synthetic Biology
- Evolutionary Biology

What we look for:

- Strong academic records and letters of recommendation
- Past research experience a plus, but not a must
- We consider freshmen to rising seniors
- Students interested in pursuing a PhD or MD/PhD, first-generation college students, and students from under-represented backgrounds, are especially encouraged to apply.
